Tue 23/12
Workout 1

Week 1

KNEE STRENGTHENINIG PROGRAM

WARM UP

1. Leg swings 01189

10sec	Fast	
1 x	10	ES
Tue	B-Wgt	
23/12		

2. Leg swings 01192

10sec	Fast	
1 x	10	ES
Tue	B-Wgt	
23/12		

3. Climber 05462

10sec	Slow	
1 x	10	ES
Tue	B-Wgt	
23/12		

4. Lateral lunge 02139

10sec	Slow	
1 x	10	ES
Tue	B-Wgt	
23/12		

5. Forward lunge backward lunge 05188

10sec	Med	
1 x	10	ES
Tue	B-Wgt	
23/12		

6. Single leg reach 02122

10sec	Slow	
1 x	10	ES
Tue	B-Wgt	
23/12		

7. Prone knee flexion 10220

10sec	Slow	
1 x	10	ES
Tue	B-Wgt	
23/12		

SLOW

8. Lunge into Hip Mobility Stretch 10044

10sec	Slow	
1 x	10	ES
Tue	B-Wgt	
23/12		

MAIN PART

9. Lunge 02128

30sec	Med	
3 x	8 ES	
Tue	B-Wgt	
23/12		

Bodyweight

10. Monster Walks 10035

3 x	10 m	ES
Tue		
23/12	B-Wgt	

Mini-banded

11. Glute Bridge with Mini Band 10163

30sec	Med	
3 x	8	
Tue		
23/12		

Unweighted

12. Wall half squat stabilization 03016

30sec	Med	
3 x	30	
Tue	B-Wgt	
23/12		

13. Deadlift 10032

30sec	Med	
3 x	8	
kg	10	
Tue		
23/12		

Use broom

14. Standing Leg Extension 10488

30sec	Med	
3 x	10	ES
kg	10	
Tue		
23/12		

15. Straight leg leg raise 03390

30sec	Med	
3 x	10	ES
Tue	B-Wgt	
23/12		

Key : Activate the VMO - This is done by pointing toe outward as you raise your leg.

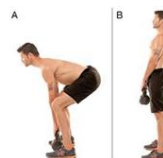

Climber 05462

Tips: Flex the hips to take the feet to the outside of the hands & repeat the movements with both legs in an alternating fashion. Place the feet flat on the ground & keep the elbows slightly flexed.

Cautions: Gradually increase the speed & range of the movements. Keep the neck in line with the spine.

Deadlift 10032

Use broom

Tips:

Cautions:

Forward lunge backward lunge 05188

Tips: Lunge forward & backwards continuously, keeping the shoulders above the hips. Maintain a rigid torso during the lunges. The depth of the lunges can vary depending on the requirements of the exercise. The knees should track in line with the centre of the feet & push firmly after each lunge.

Cautions: Do not allow the front knee to travel past the vertical position of the toes unless specified otherwise by an exercise professional.

Glute Bridge with Mini Band 10163

Unweighted

Tips:

Cautions:

Lateral lunge 02139

Tips: Keep the hands in front of the chest for balance with the torso erect & the shoulders above the hips. Contact the ground with a heel to toe stride then push firmly back to the start position. The lead knee should track in line with the centre of the foot while the hips & shoulders remain square.

Cautions: Do not allow the front knee to travel past the position of the foot unless specified otherwise by an exercise professional.

Leg swings 01189

Tips: Hold onto an object for additional balance & start with the hips & shoulders facing forward. Maintain an upright posture & keep the leg relaxed during the swings. Gradually increasing the range of motion. Try to swing the leg straight through unless specified otherwise by an exercise professional.

Cautions: Warm up prior to commencing this exercise. Gradually increase the range of motion & the speed of the swings.

Leg swings 01192  Tips: Hold onto an object for additional balance & start with the hips & shoulders facing forward. Maintain an upright posture & keep the leg relaxed. As the leg swings away from the body, allow the leg to straighten in a controlled kicking fashion. Cautions: Warm up prior to commencing this exercise & gradually increase the range of motion & the speed of the swings. Do not forcefully lock out the knee as the thigh extends at the end of the swing.	Lunge 02128  Bodyweight Tips: Place the hands on the hips & take an exaggerated step forward. Keep the torso erect with the shoulders above the hips. Contact the ground with a heel to toe stride while keeping the lead knee directly over the foot then push firmly back to the start position. The thigh of the trail leg should be almost perpendicular to the ground with the knee under the hip. The knees should track in line with the centre of the feet while the hips & shoulders remain square. Cautions: Do not allow the front knee to travel past the position of the foot unless specified otherwise by an exercise professional.
Lunge into Hip Mobility Stretch 10044  Tips: Cautions:	Monster Walks 10035  Mini-banded Tips: Cautions:
Prone knee flexion 10220  SLOW Tips: Cautions:	Single leg reach 02122  Tips: Keep the supporting leg slightly flexed however the amount of knee bend may vary depending on the requirements of the exercise. Lean forward at the hip to reach to the outside of the foot then extend to the start position & repeat the movements with the other hand. Raise the unsupported leg to assist with balance & hold dumbbells to progress the exercise. Cautions: Keep the neck in line with the spine. Do not allow the spine to flex unless specified otherwise by an exercise professional.

Standing Leg Extension 10488

Tips:

Cautions:

Straight leg leg raise 03390

Key : Activate the VMO - This is done by pointing toe outward as you raise your leg.

Tips: Take a firm grip on the bar above the head with the head, shoulders & hips supported. Keeping the legs straight, flex the hips to approximately 90 degrees then lower the legs back to the start position. The total range of motion will be determined by the strength of the abdominal muscles & by flexibility of the hamstrings & hips. Place a medicine ball between the knees or feet to increase the resistance for this exercise.

Cautions: Control both phases of the exercise. Do not allow the spine to extend as the legs return to the start position.

Wall half squat stabilization 03016

Tips: Keep the head & shoulders against the wall with the feet approximately shoulder width apart. Flex the hips & knees until the thighs are parallel to the ground then extend to the start position. Keep the hands pressed against the wall with the arms straight during the squat. The time spent at the bottom of the squat may vary depending on the requirements of the exercise.

Cautions: The knees should track in line with the centre of the feet. Do not allow the knees to travel past the vertical position of the toes unless specified otherwise by an exercise professional.
