END OF SESSION

### Acceleration 00461

3 PT STARTS

Tips: Start in a stationary position then accelerate & apply correct sprinting technique immediately. Consider using resistance equipment such as sleds or chutes to modify the exercise.

Cautions: Warm up before commencing the sprinting exercises & ensure that you have adequate grip on the ground.

### Acceleration 01989

acceleration 10-15 m

Tips: Start walking slowly & then accelerate as fast as possible. Apply correct running technique immediately & consider using resistance equipment such as sleds or chutes to increase the resistance.

Cautions: Warm up before commencing the sprinting exercises & ensure that you have adequate grip on the ground.

### Acceleration deceleration 01041

acceleration 10-15 m

Tips: Start with the hips & shoulders square & facing forward then accelerate in a straight line for the prescribed time or distance. Apply correct running technique immediately & consider using resistance equipment such as sleds or chutes to increase the resistance.

Cautions: Warm up before commencing the sprinting exercises & ensure that you have adequate grip on the ground.

### Agility 01046

15m cutting sprint

Tips: Run forward & change direction to cut on an angle of approximately 45 degrees with each turn. The speed & angle of the cutting can vary depending on the requirements of the exercise.

Cautions: Ensure that you have adequate grip on the ground & that the surface is flat.

### Agility 05826

5m by 10m

Tips: Start with a split stance & leaning forward at the hips with the shoulders forward & the knees flexed. The feet should face forward & position the arms ready to accelerate. Stay low while changing direction around the cones & keep the feet moving. The distance between the cones can vary depending on the requirements of the exercise.

Cautions: Warm up adequately prior to completing the agility drills. Ensure that the footwear has adequate grip & support.

### Agility 05830

5m by 5m

Tips: Start with a split stance & leaning forward at the hips with the shoulders forward & the knees flexed. The feet should face forward & position the arms ready to accelerate. Stay low while changing direction around the cones & keep the feet moving. The distance between the cones can vary depending on the requirements of the exercise.

Cautions: Warm up adequately prior to completing the agility drills. Ensure that the footwear has adequate grip & support.

### Agility 05834

5m by 5m

Tips: Start with a split stance & leaning forward at the hips with the shoulders forward & the knees flexed. The feet should face forward & position the arms ready to accelerate. Stay low while changing direction around the cones & keep the feet moving. Keep the shoulders inside the vertical position of the outside leg to change direction during the shuffle. The distance between the cones can vary depending on the requirements of the exercise.

Cautions: Warm up adequately prior to completing the agility drills. Ensure that the footwear has adequate grip & support.

### Agility 05841

20m multi-direction sprint

Tips: Start with a split stance & leaning forward at the hips with the shoulders forward & the knees flexed. The feet should face forward & position the arms ready to accelerate. Continue to swing the arms & keep the shoulders forward of the hips. The distance between the cones can vary depending on the requirements of the exercise.

Cautions: Warm up adequately prior to completing the agility drills. Ensure that the footwear has adequate grip & support.

### Agility 05842

suicide 20 m sprint (divided into 5 m)

Tips: Start with a split stance & leaning forward at the hips with the shoulders forward & the knees flexed. The feet should face forward & position the arms ready to accelerate. Lower the hips & shoulders to decelerate in preparation for accelerating backwards & continue to swing the arms. The distance between the cones can vary depending on the requirements of the exercise.

Cautions: Warm up adequately prior to completing the agility drills. Ensure that the footwear has adequate grip & support.

### A-march 01270

Tips: Start with an erect posture with the shoulders back. March forward & press up onto the ball of the foot & simultaneously flex the opposite hip. Dorsi flex the foot of the recovery leg then drive the foot into the ground. The ball of the foot should land on the ground first & directly beneath the hips. Swing the arms in time with the legs & keep the shoulders & hands relaxed. Repeat the movements while maintaining balance.

Cautions: Maintain a rigid torso & do not round the shoulders or flex the spine.

### A-skip 01283

Tips: Start with an erect posture with the shoulders back. Keep the chin parallel to the ground & the chest out. Skip forward & bring the heel over the opposite knee & dorsi flex the foot. The ball of the foot should land on the ground first & directly beneath the hips. Drive the foot down into the ground then flex the hip straight up.

Cautions: Do not round the shoulders or flex the spine. Warm up adequately before commencing this exercise at a higher intensity.

### Backwards running 00292

backward sprint 15m

Tips: Run backwards by pressing off the balls of the feet & continue swinging the arms quickly. Emphasize fast steps rather than long strides & do not lean the torso too far back.

Cautions: Warm up adequately before commencing this exercise. Ensure that the ground has adequate grip to accelerate.

### Bounding 00289

#### SINGLE LEG BOUND FOR DISTANCE

20m bounding as fast as possible

Tips: Push firmly off each leg & adopt an exaggerated running technique. Dorsi flex the foot as each hip is flexed & continue to swing the arms in a running fashion. Minimize the contact time with the ground & emphasize length with each stride.

Cautions: Warm up adequately before commencing this exercise. Ensure that the ground has adequate shock absorbing qualities.

### Broad jump 05322

Tips: Begin in the landing position with the shoulders over the knees & the knees over the ankles. Swing the arms forward & jump as far forward as possible. Land on the entire foot & allow the ankles, knees & hips to flex to absorb the landing.

Cautions: Ensure that the surface is non slip & that you have adequate footwear.

### B-skip 01418

Tips: Start with an erect posture with the shoulders back. Keep the chin parallel to the ground & the chest out. Skip forward & bring the heel over the opposite knee & dorsi flex the foot. The ball of the foot should land on the ground first & directly beneath the hips. Drive the foot down into the ground then flex the hip straight up.

Cautions: Do not round the shoulders or flex the spine. Warm up adequately before commencing this exercise at a higher intensity.

### Forward leaning knee lifts 01505

Tips: Maintaining a rigid torso, flex the hips straight up then drive the feet back into the ground. Dorsi flex the feet as soon as the feet leave the ground. The feet should contact the ground behind the hips. Do not allow the heels to contact the ground.

Cautions: Ensure that the ground has adequate grip. Warm up prior to commencing this exercise at a maximal intensity.

### Jump rope 00893

Tips: Keep the shoulders above the hips & continue to look forward during the skips. Keep on the balls of the feet & not the heels. Increase the speed of the skips & decrease the contact time with the ground to progress the exercise.

Cautions: Gradually increase the speed of the

### Jump rope 00897

Tips: Keep the shoulders above the hips & continue to look forward during the skips. Perform two swings for each jump & keep on the balls of the feet & not the heels.

Cautions: Warm up prior to commencing this skipping variation.

Jumping Lunges 10307

EXPLOSIVE LUNGES FOR HEIGHT

Tips:

Cautions:

Resisted running acceleration 00457

20m sprint using a backpack to add resistance

Tips: The resistance in the weighted vest can vary depending on the requirements of the exercise & the strength of the individual. Start with the stronger leg in front with the same arm extended & do not place too much weight through the supporting arm. Accelerate & apply correct sprinting technique immediately from the three point position. Increase the weight of the vest to progress the exercise.

Cautions: Warm up before commencing the sprinting exercises & ensure that you have adequate grip on the ground.

Resisted running acceleration 00458

20m sprint using a backpack to add resistance

Tips: The resistance in the weighted vest can vary depending on the requirements of the exercise & the strength of the individual. Set up with the stronger leg in front with fingers on the ground & the arms straight. Lift the knees off the ground then accelerate & apply correct sprinting technique immediately. Use blocks & perform the drill on a running track with spikes to maximize the benefit from this exercise. Increase the weight of the vest to modify the exercise.

Cautions: Warm up before commencing the sprinting exercises & ensure that you have adequate grip on the ground.

Resisted running acceleration 00459

20m sprint using a backpack to add resistance

Tips: The resistance in the weighted vest can vary depending on the requirements of the exercise & the strength of the individual. Lean forward at the hips then accelerate & apply correct sprinting technique immediately.

Cautions: Warm up before commencing the sprinting exercises & ensure that you have adequate grip on the ground.

Run burpee run 01908

sprint 10m, burpee then sprint 10m

Tips: Sprint forward then perform burpees for the prescribed repetitions then sprint forward again. Repeat this pattern continuously for the prescribed time or distance. Establish correct sprinting mechanics as soon as possible after the burpees.

Cautions: Warm up adequately prior to increasing the speed of the run. Ensure that the ground has adequate grip do accelerate & decelerate rapidly.

Star jumps 01302

Tips: The height of the jumps & width of the landing can vary depending on the requirements of the exercise. To increase the resistance of the exercise, hold dumbbells in each hand.

Cautions: Maintain a rigid torso & do not allow the torso to flex or collapse during contact with the ground. Adequately warm up before commencing plyometric exercises. The landing surface should possess adequate shock absorbing qualities. Consider surfaces such as grass or a hard rubber mat.

## Starts acceleration 01038

acceleration 10-15 m

Tips: Set up with the stronger leg in front with fingers on the ground with the arms straight. Lift the knees off the ground then accelerate & apply correct sprinting technique immediately. Use blocks & perform the drill on a running track with spikes to maximize the benefit from this exercise. Consider using resistance equipment such as sleds or chutes to increase the resistance.
